DEPARTMENT OF COMPUTER SCIENCE

CERTIFICATE

*This is to certify that Mr. **A.Vedhesh** , a student of class XII has successfully completed the project Programming for **Sports Shop** under the guidance of **Mrs. CH. KIRAN KUMARI, PGT (C.S.)** during the year 2023-24 in partial fulfilment of computer science practical examination conducted by AISSCE-2023-24.*

Date:

ACKNOWLEDGEMENT

*I would like to express my special thanks of gratitude to my teacher **Mrs. CH KIRAN KUMARI, PGT (C.S.)** as well as our Principal **Mr. SANKAR RAMISHETTY** who gave me the golden opportunity to do this wonderful project on the topic '**SPORTS SHOP**', which also helped me in doing a lot of Research and I came to know about so many new things I am really thankful to them.*

Secondly, I would also like to thank my family who helped me a lot in finalizing this project within the limited time frame.

AIM & INTRODUCTION

AIM:

To create a user friendly application on the topic sports store for sports equipment using python and mysql connectivity.

INTRODUCTION:

This project has been developed to know how an application works. To achieve this, python IDLE 3.7 is used which is a powerful and simple software to develop any program. This software does not require much knowledge about any programming language.

This project allows you to view the particulars, select an item, order the item, updating an item, deleting an item, adding an item, filter through different options and check previous purchases

SOFTWARE AND HARDWARE

APPLICATIONS

SOFTWARE:

- *IDLE SHELL v3.9.6*
- *MySQL 8.0 Command Line Client*
- *Microsoft Word*
- *Windows 11*

HARDWARE:

- *8 GB RAM*
- *11th Gen Intel(R) Core(TM) i5-1135G7 @ 2.40GHz 2.42 GHz Processor*
- *Standard I/O Devices*

PREREQUISITES

FUNCTIONS

Update(): This will take the required data to update a particular record in the specified table, this function will be use by the management section of the code.

Delete(): This will Delete a record in a specified table according to the user choice, this function will be use by the management section of the code.

Add(): This will add a new record according to the user choice, this function will be use by the management section of the code.

Check(): This function will display the previous purchases of a particular customer or it will display the previous purchases of every customer, this function will be use by the management section of the code.

Filter(): This function will filter the items according to the type of equipment the customer needs, this function will be use by the client section of the code.

Table(): This function is used to display the table contents in python.

Purchase(): This function will have all the required steps to continue purchasing the item. This also add the customer details in the Order_History table.

Check history(): This function Allows the customer to see their previous purchases. This function will be use by the client section of the code.

Interface(): This function is the design used in the starting of the code as a Welcome message.

Tq(): *This function is the design used at the end of the code as a Thank you message*
